

Redefining Bio Utilization with True Nature

In response to the needs of CBAM and Sustainability, Bio Utilization products were born in the market.

However, the products with the appearance of True Nature... have been unable to fully integrate with the materials of BIO-CONTAINED!

And San Fang heard what market needs !

Following the first emergence of the BOTAN series in AW23 , which rapidly carry into mass production

Another material, BOTAN-SOFT, was following up and launching on SS24~

BOTAN-SOFT emphasizes a softer texture, which can satisfy consumers who demand more "Comforting" & "Cozy"

Plus the excellent designing skills of San Fang

Tree Bark/Marble/Cork... These excellent likeness appearances are also added to the design elements.

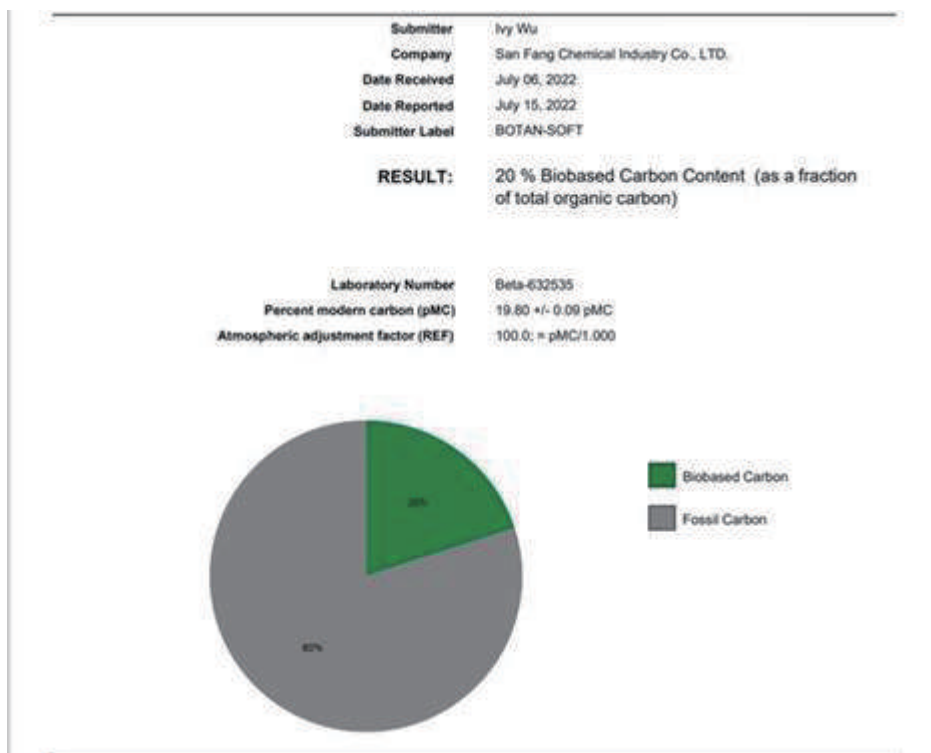

Biomass substrate + Simulated appearance + Metaverse concept that subverts the stereotype of consumers...

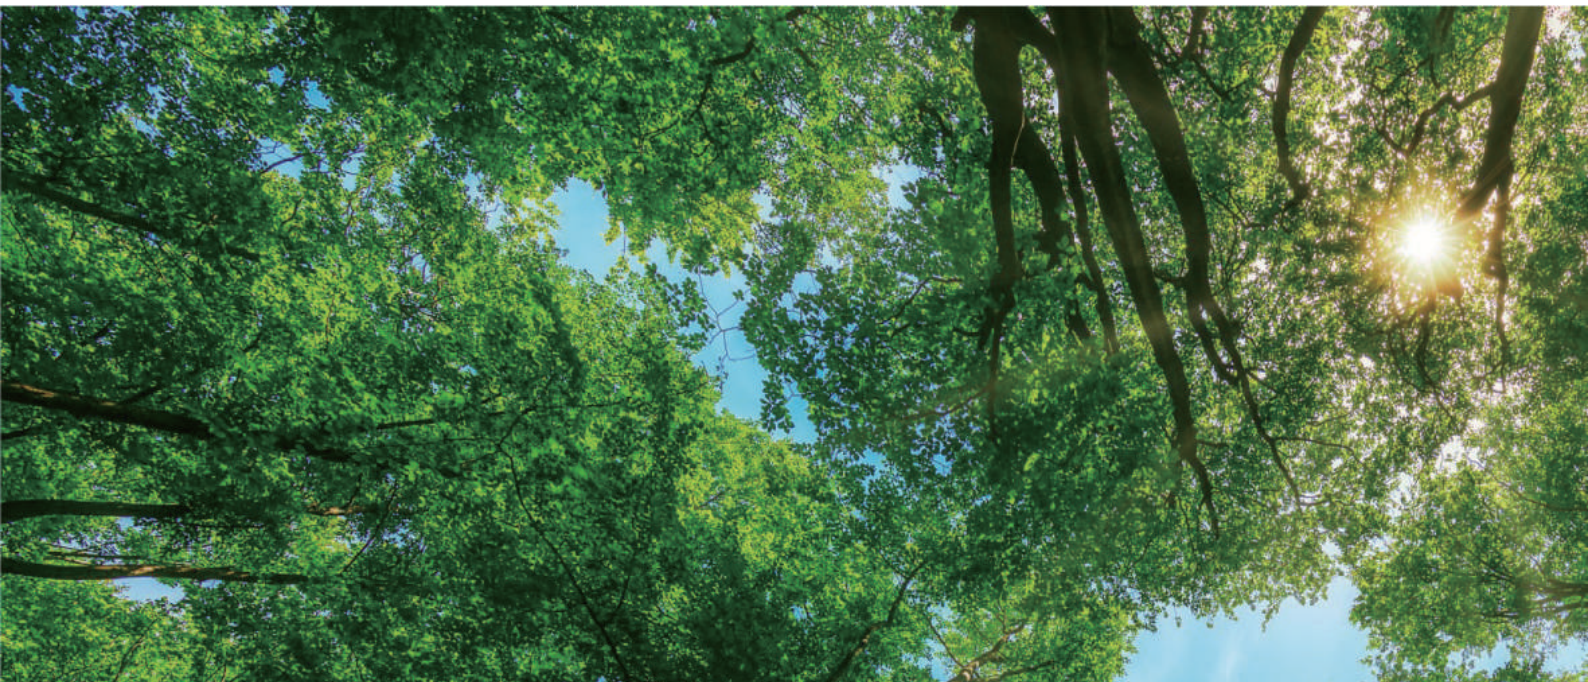

Let us liberate the innovative imaginations ~
