

Product Feature

Concept: Colors Come Alive

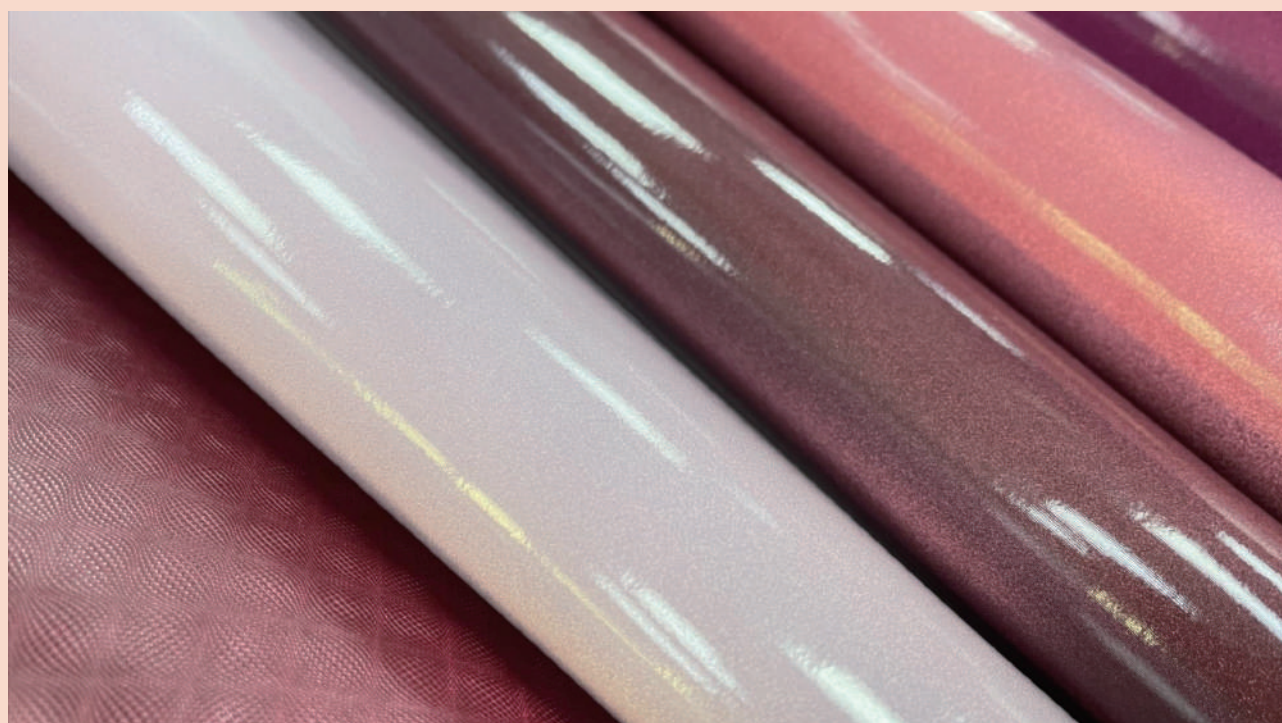

We transformed the natural beauty of sunlight and rippling water into shimmering effects on leather.

The fleeting ripples left by a gentle breeze on the water's surface — We've preserved them.

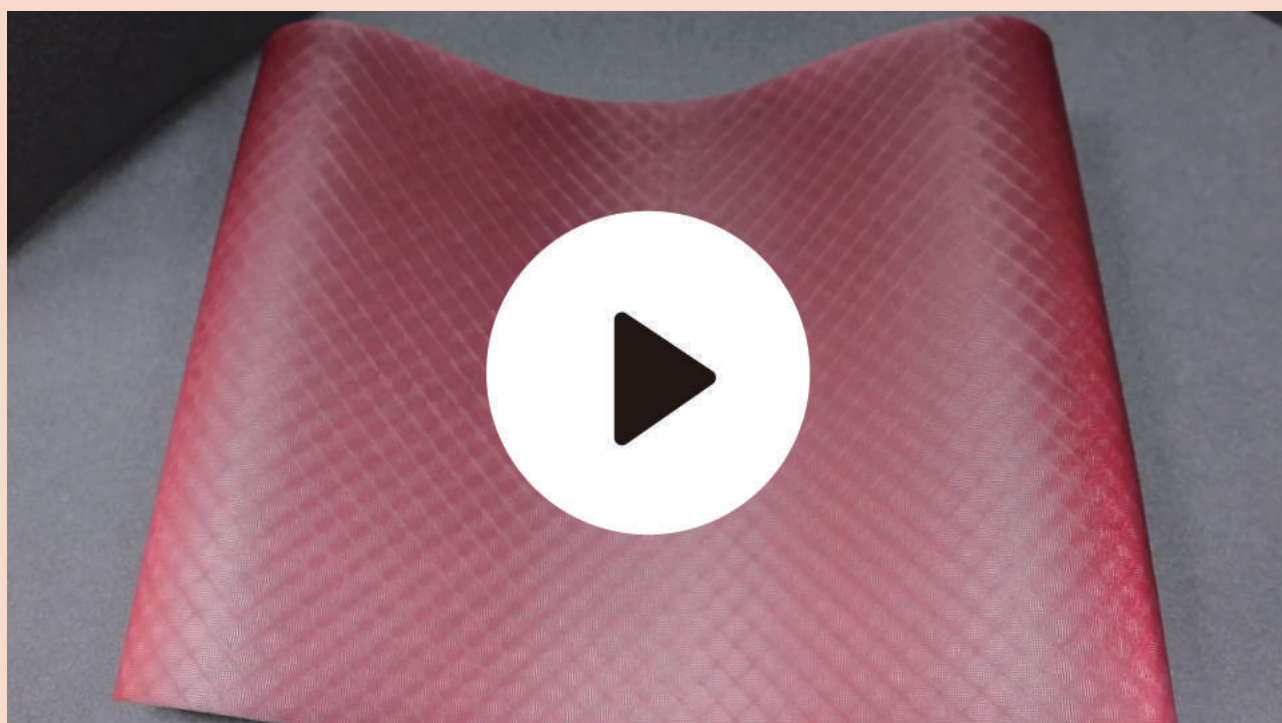

Every shift in angle feels like admiring a miniature nature exhibition.

San Fang has made the impossible possible once again!

The birth of the RIPPLE effect sets an awe-inspiring stage for AW26.

We've captured the dynamics of movement in the stillness of color.
San Fang has given colors a soul!
