

As Christmas is coming

The pure white snow outside and the sparkling decorations on the Christmas trees are bringing a colorful and happy atmosphere

This also got us thinking...

The appearance should no longer be plain...it should be shining with a different luster~

According to ancient legends,

Seeing the aurora will bring happiness for a lifetime!

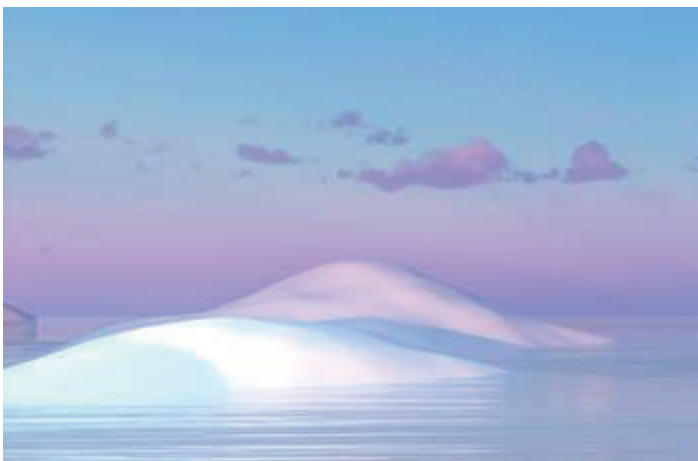

San Fan realized this ancient legend...

And we launch the **AURORA** effect for the **AW24**

---

It can be candy-like mildly shimmering,  
It can be a reflective sheen like snow as well,  
It can also be more like the soft and gorgeous northern lights...

***AURORA's*** delicate pearl effect which shines with  
its own light  
Let's work together to catch the happiness for a lifetime.
