

Starting from AW24, San Fang website will be launching a new 360-degree rotation material simulation experience.

No more time-wasting on waiting for materials make into sample shoes.

You can experience the physical effect of the material in no time!

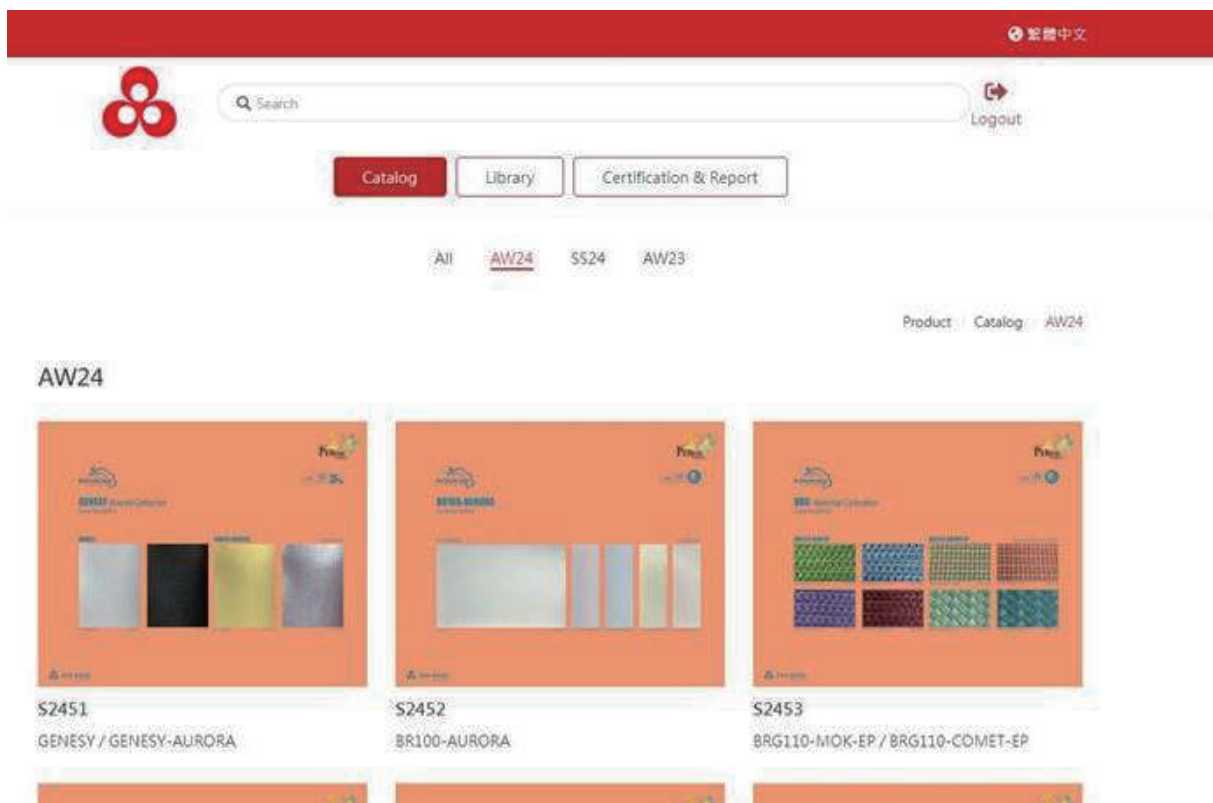

The website will open browsing for AW24 material catalog and 360-degree shoe simulation from now on.

STEP1. After entering the website, please click AW24 material catalog in "Catalog" (only AW24 is available at the moment)

STEP2. Choose any page and click on it. If you see a button  in the picture, click then you can see the simulated shoe picture made by the material!

(Few materials were limited and without simulation picture due to its own characteristic. Such as the lining material!)

BRG130-MOK-EP

Substrate
Bio skin+Recycle Nylon microfiber non-woven

Color develop
YES

Application
Vamp

Production location
CHINA / TAIWAN

Remark
1. Some poorly physical properties may caused by emboss plate.

STEP3. Press the mouse to perform 360-degree rotation.
