

Clean water is important.

This is one of the issues that can't be ignored in order to enter the **Net Zero** and sustainable operation;

Since San Fang introduced the "Dye-Free" process in 2021, the relevant materials have been discussed and recognized by the market!

Especially the VSUEDE series products!

Starting from AW24 season... San Fang has once again evaluated our technics.

RF-VSUEDE series has officially launched.

S2475

RF-VSUEDE70 / RF-VSUEDE140

Substrate

PU+Recycle Nylon microfiber non-woven

Color develop

YES

Application

RF-VSUEDE70 : Lining / Collar

RF-VSUEDE140 : Vamp

Production location

TAIWAN

Remark

RF-VSUEDE70 : 1. Standard "White" color.

RF-VSUEDE140 : 1. Buffing surface is necessary in order to get better bonding.

2. Standard "White" color.

Compared with the original VSUEDE...

Base "evolved", which changed into Recycle Nylon microfiber;

The chemical content has "purified"...

We use BIO colorant to replace the old ones.

The making process had more evolved , compare to the genuine leather SUEDE.

Reduce 99.99% usage of the fresh water, and it even reach

Solvent Free/ Chromium Free.
